### Reasons For Allowance

- Applicants' arguments along with the entire disclosure have been fully considered, and are deemed persuasive mainly because of the problem to be solved: signal *'degradation due to lower signal-to-noise ratios and less sensitivity to variations in the head-to-tape separation due to increases in signal data density.'*
- Though **the prior art of record**- USPGPub. # 20030026028 to *Ichihara et al.* - discloses, e.g., in para. 2, 13 et seq., and Figs. 4a, 10a, a tape drive system comprising tape head adequately positioned for tape data access, filter means to block out unwanted signal frequencies based on system design requirements, signal decoders composed of viterbi processors and low density parity check decoders along with associated logic to generate read signals, process such to recover original data; **the prior art of record** fails to teach the combination of limitations as claimed in **Claims 1-18** to address the signal degradation formulated above.
- **Claims 1-18** are thus allowed.
- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
